HOBBIES

Music (Percussions for 6 years)
Cooking
Reading
Bouldering
Knitting
Electronics

PROFILE

After 3 years of work-study and a Master's degree, I'm looking for a **junior position** as a game programmer to help create new experiences and keep learning new skills from other enthusiasts.

EDUCATION

MASTER'S DEGREE IN VIDEO GAMES & DIGITAL INTERACTIVE MEDIA - COMPUTER SCIENCES 2024 - 2026
CNAM ENJMIN, Angoulême

BACHELOR'S DEGREE IN COMPUTER SCIENCE FOR VIDEO GAMES 2021 - 2024
CNAM ENJMIN, Angoulême

PROFESSIONAL EXPERIENCE

GAMEPLAY PROGRAMMER | FLIGHT SIMULATOR Mar 2026 - Sep 2026
At Asobo Studio, Bordeaux - C++, Zouna Engine

- Developed and integrated new gameplay features for a new game mode
- Added new features to existing systems (Air Traffic Control, Flight Plans computation)
- Improved the AI behaviour in accordance with the designers' intentions
- Identified and fixed bugs in the simulation
- Helped to improve how some objects spawn in the world to make it more realistic

GAMEPLAY & TOOLS PROGRAMMER Jan 2022 - Sep 2024
At Acreos, Metz - C#, Unity

- Developed and integrated exercise "bricks"
- Created tools to help development (automatic asset verification system)
- Managed the physics and behaviour of simulated construction vehicles in Unity
- Miscellaneous (bug tracking and resolution, code reviews...)

SEASONAL WORK Summers 2021-2022 | 2 months
At the Domaine de la Fessardière

- Work in a vineyard (pre-pruning, bottling, labelling, etc.)

MAIN PROJECTS

12 ABROAD ST. School Project | Team of 9 | Oct 2025 - Now
Gameplay, UI and Tools programming, Tech art - **Unity, C#, HLSL**

- Architected and implemented the interaction system, trying to make it as extensible as possible to anticipate future requirements
- Created tools to import datas from CSVs, organise the asset hierarchy, check the assets sanity before each build
- Implemented an ASCII art image processor using a combination of shaders and compute shader
- Managed the Git repository and reviewed pull requests

UNITY UTILITY Personal Project | Jan 2023 - Now
Tools programming - **Unity, C#**

- A Unity package bringing together many tools and useful code I made along my other projects to be able to reuse them easily

ONIONMAN School Project | Team of 5 | Jan - Jun 2023
Network, Gameplay and Tools programming - **Unreal Engine, C++, Unity, C#**

- Cross engine project
- Built a custom Unity - Unreal Engine network protocol
- Created an Unreal Engine editor tool for level design

For a more complete overview of my various projects, you can check out my [portfolio](#) as well as my [GitHub page](#).
